ISSUE:delayed poweroff

Concerned platforms:

OS : Linux

Vernouillet, 07.2.2010

Issue:

Shut down your PC after a render or simply after playlist is over.

Here is the procedure in command line

```
david@PinguFly:~$ sudo shutdown -h 5  
[sudo] password for david:
```

```
Broadcast message from david@PinguFly  
(/dev/pts/0) at 23:25 ...
```

```
The system is going down for halt in 5 minutes!
```

Or.

```
sudo shutdown -P hh:mm
```

autre: différences entre -h et -P ?

Alternatively you can install

gshutdown or kshutdown (apt-get install ...)

Pls. send us your feel back.
