ISSUE: ubuntu debian faq

Concerned platforms:

OS : Linux Debian / Ubuntu distrib

Vernouillet, 02.05.07

Issue:

1. ubuntu comes with root account disabled, to access root features it needs “sudo” commands.

Terminal: run a root session

Command: **sudo bash + pswd**

to re-activate root account:

Command: **sudo passwd root**

Then you can connect as root with pswd

2. re-configure package

sudo dpkg-reconfigure *package_name*

ex: sudo dpkg-reconfigure xserver-xorg to reconfigure X11

Pls. send us your feel back.
