ISSUE: Defocus second field on&off

Concerned platforms: Alacrity / Softworks

Vernouillet, 18.02.2010

Issue: second field defocused this option can be switched on & off only if registry base is set it for. This keyboard shortcut will only show in the list, if a registry entry has been added.

Go in REGEDIT via Start > Execute > regedit

HKEY_LOCAL_MACHINE\SOFTWARE\Lightworks\Configuration folder

Show Debug command true (case sensitive)

You will then see [_Toggle_CompensateForRasterContradiction] as an assignable keyboard shortcut, allowing you to turn this Off or On.

It is possible since the Alacrity was restored from a ghost image, that this entry/shortcut has not been reassigned.

Thanks Mat.

Pls. send us your feel back.
