ISSUE: Lightworks Disk Manager multiply the same Disks over and over

Concerned platforms:

LIGHTWORKS MR, MR+, Touch & Softworks

Vernouillet, 10.11.2006

ISSUE & SITUATION:

As real disk resources you have 2 drives; E and F. As you are editing, one or several disks start to appear in disk manager, it is not critical but disturbing...

Conditions: You are working in Local Project this issue is replicable in all rooms. Disks are added when you go in the lobby and return to your project.

SOLLUTION:

A Network project file gets by accident into your Local Project and is conflicting, this can happen when a network project is copied “manually” into a Local Project.

To correct this issue:

Goto c:/lwproj

Look for a file called; “DefNetDrive.txt”

Erase it.

Re-start you application, and check that issue is gone.

Pls. send us your feel back.
