## ISSUE: Lightworks under W7 misses drives seen otherwise

Concerned platforms: New LW under Windows7 32 or 64

Vernouillet, 31.07.2011

### **Issue :**

**Ressources visible in windows explorer like drive D: E: H: are not seen as Material drive available for RECORDING or RENDERING into it. It simply do not appears in DISK manager or Recording panel target disks.**

**In the other hand those missing resources are seen in Lightworks environment when it is used as SOURCE devices in Import, or EDL...**

The reason of this is a question of RIGHT MANAGEMENT under Windows 7 specifically.

**To solve this RUN the LIGHTWORKS Application just ONCE as ADMINISTRATOR. For this go on the LW Shortcut, right-click and use RUN AS ADMINISTRATOR.**

**The application will start will all drives. Then every time you will run it as user it will stay as is...**

Thank you Mat.

Pls. send us your feel back. Rev.1 – David 31.07.2011
