ISSUE: new structure of Lightworks 10 and above

Concerned platforms: New LW 10.0.x

Vernouillet, 11.10.2010

Issue : from Lightworks V1 till now all user were used to file structure. Projects stored in C/LWPROJ... With V10. This is about to change.

The new structure concentrates all Lightworks data in:

System_drive:\Documents and Settings\All Users\Documents\Lightworks

<DIR> **Audio Mixes**
<DIR> **Databases**
<DIR> **Devices**
<DIR> **Effect Templates**
<DIR> **Images**
<DIR> **Lists**
<DIR> **Logs**
<DIR> **Plug-Ins**
<DIR> **Preferences**
<DIR> **Projects**

The \Logs directory, contains the latest ERROR.LOG and SysINFO.nfo generated. \BACKUP hosts compressed logs. For debugging pls pass recent files to support.

PROJECTS hosts all the local projects you will edit. The C:\LWORKS is no longer used. This location can be deleted. Same as all Lightworks directories present in the root of C:\ like LISTS...

The LIGHTWORKS software is by default saved in:

System_drive:\Program Files\Lightworks\Lightworks

MACHINE.NUM is now incorporates this information now in the registry base to check it search for:

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Lightworks\Configuration

Check for reg key: machine.num does not have a number over 2500

Pls. send us your feel back. Rev.2 – David 31. 07.2011
